

Top Class Finishing Touches to Bentley Show Room

What was our client looking for?

Our client required a professional subcontractor who could deliver an immaculate, premium decorative finish in a state-of-the-art workshop and showroom facility dedicated to Bentley Motors.

How did we help?

Working to the main contractor's programme, a defined schedule was agreed to decorate the new surfaces prior to installation of specialised plant. Careful sequencing was required with fluctuating labour levels to achieve the tight handover deadline. Motorised access equipment was required to carry out the decoration to high level areas, operated by trained and competent staff. Works were carefully planned and executed to reduce risk to other subcontractors who needed to progress their work in close proximity to our own.

The results

The new Bentley facility, operated by Vindis Group, has been impeccably presented to reflect the quality and prestige of this historic marque. Decoration work was completed by the agreed deadline to enable the facility to open on time. The main contractor placed their trust in us to avoid costly penalties for a late handover and this was repaid in full.
